

# CRAIG MATTSON – LIVESTOCK EXCLUSION

## CLFLWD COST-SHARE

In cooperation with the Comfort Lake / Forest Lake Watershed District, the Chisago SWCD assisted in the planning and implementation of multiple practices to improve water quality for Moody Lake and its watershed. These projects include: fencing cattle out of surface water wetlands, prescribed grazing management, and long term permanent vegetation planting in a conventional agricultural field normally planted into annual crops. These projects are important in protecting our natural resources for fish and wildlife species that depend on good water quality.

### Partners:

Comfort Lake / Forest Lake Watershed District  
Chisago SWCD

### Pollutant Reduction:

TSS: 4.6 tons/yr  
TP: 13.8 lb/yr  
(*BWSR Pollution Reduction Calculator*)

### Targeted Water:

Moody Lake

### Completion Date:

10/14/2011
