GULLY STABILIZATION–WATER & SEDIMENT CONTROL BASINS

A series of large gullies along the St. Croix River escarpment were stabilized by the installation of two water and sediment control basins and a grassed waterway on the Mallery farm. These gullies historically contributed large amounts of sediment and phosphorus to the St. Croix River.

Partners:

Chisago SWCD
Landowner

Pollution Reduction:

Total Suspended Solids (TSS): 96 tons/yr
Total Phosphorus (TP): 83 lbs/yr
(BWSR Pollution Reduction Calculator)

Targeted Water:

St. Croix River

Completion Date:

October 2013

May I Visit?

No. These practices are located on private property and cannot be seen from the road.
