Exp: _____ **3 digit code:** _____

#~**NORWAY SPRUCE** (*Picea abies*)
Fastest growing spruce, soils-sandy loam through clay in full sun. Mature height 80' tall.

*~**WHITE SPRUCE** (*Picea glauca*)
Moderate growth rate, soils-sandy loam through clay in sun through shade. Mature height 50-75' tall.

#~**BLACK HILLS SPRUCE** (*Picea glauca densata*) Moderate growth rate, soils-loamy sand through clay, will tolerate full to partial sun. Mature height 30-50' tall.

*~**RED (Norway) PINE** (*Pinus resinosa*) Minnesota State Tree. Fast growing, soils-sand through silty loam, and full to partial sun. Mature height 75-100' tall.

*~**WHITE PINE** (*Pinus strobus*) Fast growing, soils-loamy sand through clay loam, and full to partial sun. Mature height 75-100' tall.

*~**WHITE CEDAR/AMER. ARBORVITE** (*Thuja occidentalis*)
Moderate growth rate, soils-sandy loam through clay, and full to partial sun. Mature height 30-60' tall.

*~**BLACK CHERRY** (*Prunus serotina*) Fast growing, soils-sandy loam through clay, and full sun through part shade Yellow fall color, produces an edible fruit. Mature height 70-100' tall.

*~**SILVER MAPLE** (*Acer saccharinum*)
Very fast growing, soils-sand through clay, and full sun to part shade. Mature height 60-80'.

*~**SUGAR MAPLE** (*Acer saccharum*)
Moderate growth rate, soils-sandy loam through silty loam, and full sun to shade. Has bright green leaves that turn yellow to scarlet in the fall. Mature height 50-75' tall.

*~**RED MAPLE** (*Acer rubrum*) Fast growing, prefers sand through clay and does well in sun to partial shade. Fall foliage usually red but may be yellow or orange. Grows 50 to 70 feet tall.

*~**RED OAK** (*Quercus rubra*)
Moderate growth rate, soils-sandy loam through clay, and full to partial sun. Dark green leaves that turn red in fall. Mature height 60-80'.

*#~**WHITE OAK** (*Quercus alba*)
Slow growing, sand through clay, and full sun to partial sun, and has a very high wildlife rating. Mature height 75-100'.

~**POPLAR** (*Thevestina*)
Very fast growing, soils-sand through clay, and full to partial sun. Yellow fall foliage. Mature height 70-90' tall.

*#~**WHITE/PAPER BIRCH** (*Betula papyrifera*) Moderate growth rate, soils-sand - silty clay, and full to partial sun. White papery bark makes this a popular landscape tree. Yellow fall color. Mature height 50-70' tall.

~**GOLDEN WILLOW** (*Salix alba "Vitellina"*) Fast growing, upright tree with slightly drooping branches. Will grow in most soils, prefers moist sites, full sun to partial shade. Mature height 40-55' tall.

*~**RIVER BIRCH** (*Betula nigra*)
Fast growing, soils-sand through clay, and full to partial sun, does well in a wetter site. Mature height 30-50' tall.

*~**RED SPLENDOR CRABAPPLE** (*Malus 'Red Splendor'*) Moderate growth rate, soils-sandy loam through clay in full sun. Mature height 20-30'.

*#~**COMMON CHOKECHERRY** (*Prunus virginiana*) Fast growing, soils-sandy loam - silty clay, and full - partial sun. White spring flowers with orange fall foliage. Mature height 10-20' tall.

*~**AMERICAN PLUM** (*Prunus americana*) Moderate growth rate, soils-loamy sand through silty clay, and full sun. White flowers in the spring with yellow fall foliage. Mature height 10-30' tall.

*~**HIGHBUSH CRANBERRY** (*Viburnum trilobum*) Moderate growth rate, soils sandy loam - clay, full sun - shade. Grows in uplands and lowlands. Beautiful shrub year round. White flowers, bright red berries that persist through the winter, red fall color. Fruit good for jelly and jam. Mature height 8-12'

#~**ROSA RUGOSA** (*Rosa rugosa*)
Fast growing, soils sandy loam through clay loam, full sun. One of the most trouble free roses, blooms all summer, fragrant, colors vary (red, white or pink), root suckers freely. Mature height 4 - 8 ft.

#~**COMMON LILAC** (*Syringa vulgaris*) Moderate growth rate, soils-sandy loam through clay loam, & full sun. Green foliage, lavender spring flower, mature height 10-15' tall.

*~**REDOSIER DOGWOOD** (*Cornus stolonifera*) Fast growing shrub, soil-sand through clay, and full sun. Has medium to dark green leaves and red stems. Produces berries for wildlife, and is good for wetter sites. Mature height 6-12' tall.

*~**AMERICAN HAZELNUT** (*Corylus americana*) Moderate growth rate, grows in any soil type, and sun through shade. Mature height 6-8' tall.

JUNEBERRY-Regent Serviceberry (*Amelanchier alnifolia*) Moderate growth rate, soils-sand through sandy clay, and full sun to partial sun. High wildlife rating, produces an edible sweet fruit. Mature height 4-6' tall.

NANKING CHERRY (*Prunus tomentosa*) Moderate growth rate, soils-sand loam through clay loam, and full sun to partial shade. Pinkish white flowers followed by red/yellow fruit. Widely used for jelly if not taken by birds. Mature height 6-8' tall.

SUPPLIES AVAILABLE:

Root Dip helps retain moisture and prevents tree loss due to dry conditions. It is mixed with water & the roots are dipped into the mixture before planting.

Fertilizer one tablet is dropped in the hole at the time of planting. Nutrients are released slowly over a long period.

Marker Flags 25 brightly colored 36" flags used to mark and help you keep track of young trees in grassy areas.

Plantskydd deer and rabbit repellent. This blood meal based product when sprayed on will help to deter deer and rabbits from nipping off young shoots for approximately 6 months.

* Native to Minnesota

Salt Tolerant Species

~Do not plant under power lines

PLEASE NOTE:

- ◆ Species that grow over 15 feet at mature height should not be planted under power lines.
- ◆ When planting along roadways, always remember to keep your trees out of the road right of way.
- ◆ All trees are bundled in quantities of twenty-five (25).
